13.0 INTRODUCTION

This resource report is required for construction of new liquefied natural gas (“LNG”) facilities or the re-commissioning of existing LNG facilities. The 300 Line Project does not involve the construction or re-commissioning of any LNG facility. Therefore, in accordance with Commission guidance provided in Section 380.12(o), 18 CFR § 380.12(o)(2008), Resource Report 13 addressing additional information related to LNG facilities is not required.
